

ACKNOWLEDGEMENT

I would like to express sincere gratitude to our guide [P. SOUMYA, Asst. Prof](#), of department of Computer Science and Engineering, KITW, who extended her unconditional support and spared her valuable time and her patience and valuable suggestions regarding my mini project.

I would like to wish to give a special note of thanks to [M. NAGARANI, M. Tech Assoc. Prof](#), HOD of CSE Dept. KITW, for her unique way of inspiring students through clarity of thought, enthusiasm and care. Her constant encouragement and assistance are very helpful and made my effort a success.

I also grateful to the PRINCIPAL, [Dr. S. SELVA KUMAR RAJA, B. E, M.E, Ph. D](#), KITW for providing us with the facilities and resources required for the successful completion of my mini project. I even thank him for his valuable suggestions at the time of my mini project which encouraged me to give best in mini project.

I would also like to thank our faculty and supporting staff of Computer Science and Engineering Department and all other departments for their kind co-operation directly or indirectly in making my mini project a successful one.

Finally, I want to deeply acknowledge all my friends and family members who have encouraged me during the preparation of my mini project.

DECLARATION

I **NIMMA RAVALI** hereby declare that this project has been carried out entirely under the esteemed guidance of **P.SOUMYA, Asst. Prof** for the partial fulfilment of the award of the degree of B. Tech in Computer Science and Engineering at **Kakatiya Institute of Technology & Science for Women, Manikbhandar, Nizamabad, Affiliated to JNTUH** and further it has not been submitted to any other university or institutions for the award of any other degree.

ABSTRACT

Information Retrieval (IR) in computing and information science is the process of obtaining information resources that are relevant to an information need from a collection of those resources. Searches can be based on full-text or other content-based indexing. Information Retrieval is searching for document in a file, searching for documents themselves, and also searching for texts, images from database. Automated information retrieval is used to reduce time intricacy. An IR system is a software system that provides access to documents , stores and manages those documents.

Here we are proposing Information retrieval using Natural Language Processing (NLP) and (PAC) Passive Aggressive Classifier algorithm to boost the accuracy instead of XGBOOST algorithm and SVM algorithm in IR.
